TEAM WEXLER!

We welcome you. We're here to care for you, to advise you, be available, consistent, accurate, and to be your partner in the process. Your orthodontics is so important to your health and Well-being! Your orthodontic care comes from our whole team who have a special range of talents and skills you'll need to get the best possible orthodontic advice and truly state-of-the-art treatment that is faster and better than ever before.

Our team of staff is very friendly, supportive, skilled and experienced including-

- Three Receptionists
- Four Oral Health Therapists
- Five Chairside Assistants
- Five sub-specialised Orthodontic Technicians
- Clinical Manager, Office Manager, Book-keeper

We aim to produce the best outcome suited to your particular needs, including enjoyment of the orthodontic experience.

*“We're all Here to Make
Your Orthodontics
the Best it Can Be!”*

We Provide the best there is in Orthodontics Here's Why...

We offer you more options than ever before in Australia and use a wonderful new technology - SureSmile™ digital orthodontic modeling and customized orthodontic wire manufacturing - that has raised our services to unprecedented speeds and accuracy.

These systems ensure consistently high level outcomes for all our patients and are proven to be 33% on average faster for significantly improved outcomes compared to conventional systems.

1. We offer truly Invisible Hidden Lingual Braces for upper & lower teeth using SureSmile QT® and Incognito™. Our normal braces include SureSmile®, Damon™, Damon Clear™ and Invisalign™ clear aligners.
2. With Dr Wexler's exceptional experience and his very skilled and qualified clinical staff we offer individualized treatments employing advanced techniques in unique ways to address your particular needs and circumstances.
3. Through the use of breakthrough T.A.D. technology we often now avoid options such as orthodontic surgery and needing false teeth when teeth are missing.
4. We pride ourselves on our outstanding communication ensuring your understanding and involvement in all decisions about your treatment. After consultation and in treatment we will familiarize you with all suitable options.

How Long will my Braces Take?

More than half our treatments take 9-15 months with SureSmile™ digital orthodontics and discomfort is minimal. Minor treatments take as little as 3-6 months! People value the rapid benefits so much.

The Right Age to Come?

Orthodontics can be done at any adult age. For children, age 7-8 is the best time to visit so as to not miss opportunities to minimise treatment.

We Help You with Managing Payments!

We use easy, no-cost Direct Debit plans to spread the costs into small amounts over long times.

- Minor treatments that may be appropriate are often surprisingly inexpensive.
- Significant tax rebates apply
- Dental Extras cover partly covers your treatment
- You'll get a discount for full pre-payment.
- Cost varies with complexity of treatment, it is often your choice.

What to Expect on your First Visit

Dr Wexler will ask about your concerns and examine your face, teeth and jaws. A detailed discussion will follow on all treatment options for you, including alternative treatments, time frames and costs.

X-ray pictures and photographs are taken prior to and during your first consultation. They will be analysed as part of your thorough assessment. Everything will be given to you and your dentist in detailed, illustrated reports.

Other Questions:

- You can still play sport (mouthguards are possible)
- You can still play any musical instrument
- Visits are 4-8-weekly (approx)
- Tooth coloured / clear and totally invisible braces available
- Invisible braces are only seen by people you show them to!

Referrals

Our patients are referred by their dentists, friends, family and self referral. Formal referral letters are not needed. Simply call.

Hours

We are open during normal hours. We offer before and after school appointments for routine visits but longer visits such as consultations and treatment planning need to be scheduled for less busy times of the day.
