

WHO YOU REALLY ARE.

Frequently Asked Questions

Q: Does Invisalign® really work?

A: Yes. In orthodontic and dental practices worldwide, Invisalign has been effective at straightening teeth. Nine out of ten patients are “very or extremely satisfied” with their Invisalign experience.

Q: How does Invisalign work?

A: Invisalign uses 3-D computer imaging technology to map the complete treatment from start to finish. From this plan, a series of custom-made aligners unique to your treatment is produced. Each aligner is worn for about two weeks and gradually moves your teeth, before being replaced by the next in the series until the final position is achieved.

Q: How much does Invisalign cost?

A: Only your doctor can determine the cost for your specific treatment. It depends on the kind of treatment you need, how long it takes, and even where you live. Invisalign treatment is not much more than the cost of traditional braces. In addition, if you have orthodontic insurance coverage, Invisalign is normally covered to the same extent as conventional braces. Many doctors also offer affordable monthly payment plans. Be sure to enquire about your options with your preferred provider.

Ask your doctor how Invisalign can work for you.

DOES YOUR SMILE
REFLECT THE REAL YOU?

THE INVISIBLE WAY TO STRAIGHTEN TEETH

invisalign®

LEARN HOW TO SMILE AGAIN.

invisalign®

SHOW THE WORLD WHO YOU REALLY ARE.

A Clear Alternative.

Invisalign is a virtually invisible solution so you can smile during as well as after treatment. In fact, virtually no one will know you're wearing them unless you tell. By using a series of clear, removable aligners, Invisalign straightens your teeth right before your eyes. Change them about every two weeks and your teeth will move—little by little—toward the smile you have always wanted.

Invisible. Removable. And Comfortable.

Invisalign is comfortable to wear and it doesn't require you to change your busy lifestyle. You visit your doctor every month or two to check your progression and get new aligners. Average treatment time is only about a year. Because aligners are removable, you can continue to eat your favorite foods while brushing and flossing normally to keep your teeth and gums healthy.

	invisalign	Traditional Braces
Invisible	YES	No
Removable	YES	No
No metal or brackets to irritate the mouth	YES	No
Able to brush and floss normally during treatment	YES	No

Invisalign makes it easy to straighten your teeth without bands, brackets, or wires.

Forget everything you've heard about teeth straightening. Because a proven technology now exists that lets you straighten your teeth—invisibly.

Invisalign Has Been Proven Effective In Dental Practices Worldwide.

Generalized Spacing
Treatment: 9 months, 19 aligners

Crowding
Treatment: 7 months, 14 aligners
*Treatment time and number of aligners will vary from case to case.

Ask Your Doctor How Invisalign Can Work For You.

An Invisalign Accredited doctor can offer you an initial consultation to see whether Invisalign is suitable for you. If they can't help you, go to our website to find an experienced provider in your area.

Over half a million people have already discovered Invisalign. Maybe it's time you were one of them. For more information, visit www.invisalign.com.au or call 1800 468 472 (Australia) or 0800 542 123 (New Zealand).
