

When to See the Orthodontist

At age 6-7, when new front teeth arrive, discovery of problems shown below will reduce need for treatment and improve specialist orthodontist outcomes. Adults are now treatable with invisible braces!

suresmile®

Gives faster, better results than ever.
See www.drgeoffreywexler.com.au

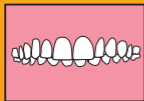

Overjet

Upper front teeth protrude

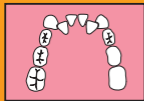

Underbite

Lower front teeth protrude

Deep Bite

Upper front teeth cover lower front teeth

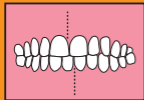

Crowding

Upper and/or lower are crowded

Narrow Arches

Upper and/or lower arches too narrow

Misalignment

Mid-lines of upper and lower arches don't line up

Excess Spacing

There is excess space between teeth
